The dashboard:

LinkedIn Top Skills for 2016..

Country Ranking by Skill (dashed line indicates global average rank for skill)
● >= Global Average Rank..

|	Cloud & Distributed Computing	Statistical Analysis & Data Mining	Web Architecture & Development Framework	Middleware & Integration Software	User Interface Design	Network & Information Security	Mobile Development	Data Presentation	SEO/SEM Marketing	Storage Systems & Management
Global	● 1									
Australia										
Brazil										
Canada										
China	● 4									
France	● 1									
Germany	● 1									
India	● 1									
Ireland	● 1									
Netherlands										
Singapore	● 1									
South Africa										
United Arab ..										
United King..										
United States	● 1									

I place the pointer on Cloud & Distributed Computing and it appears that it is one of the most in-demand skills worldwide, ranking 1# in most countries. It is worth noting that China ranked it fourth.

Since the Cloud & Distributed Computing is ranked fourth in China, I was curious about the required skills in that region. Thus, I hovered over China to explore the in-demand skills. According to the slide, Network & Information Security ranked second in terms of demand, indicating a high need for professionals in this field. Additionally, Storage Systems & Management ranked tenth. In conclusion, I would recommend individuals in China to enhance their skills in Network & Information Security to increase their employability.

United Arab ..									5	
United King..									7	
United States										

SEO/SEM Marketing is one of the most interesting skill to look at. When I clicked on it, it appears that it is not on demand even globally. So I encourage students and fresh graduate to look for another skill that going to add a value to their resume if they wand to land a job or internship especially in the United Kingdom. Furthermore, there are no roles in Brazil, Canada and China for this skill.
